The 2019 printing of this lab manual features 13 student-directed lab investigations that emphasize scientific inquiry, reasoning, and critical thinking, with a re-alignment of course content to the new AP Biology Course and Exam Description binder. The labs support each big idea in the AP Biology course. These investigations can be easily tailored to fit into any school schedule and are appropriate for large and small classes. The Teacher Manual, which includes the student labs, is available as a free PDF on AP Central and, for course-authorized AP Biology teachers, through AP Classroom. A printed book can be found for sale in this store.
